

AI INNOVATION SPRINT

Accelerate your AI journey and solve the 'right' problems first.

FAST. GREAT RESULTS. ONLY 2 DAYS.

WHAT is the AI Innovation Sprint?

The AI Innovation Sprint is an intensive 2-day workshop designed to explore and prototype high-impact AI use cases relevant for your business. By bringing together a cross-functional team of your experts with our AI specialists, the Sprint achieves actionable results:

Day 1: Clearly define the business challenge or opportunity.

Day 2: Identify AI-driven solutions, develop prototypes, and pitch the results.

WHY is it relevant for your business?

The AI Innovation Sprint is the fastest and most effective way to start your AI journey on the right track. Key benefits include:

Comprehensive Exploration: Map potential AI use cases aligned with your core business processes.

Rapid Prototyping: Identify and prototype relevant, high-impact AI solutions quickly.

Strategic Planning: Define a roadmap for Proof of Concept (PoC) and Minimum Viable Product (MVP) development.

Team Building: Lay the groundwork for a high-performing team to implement AI use cases effectively.

HOW does it work?

The AI Innovation Sprint is a structured component of an end-to-end AI project lifecycle, covering the ideation phase and initial steps of the Proof of Concept. Here's how it works:

- 1. Use Case Mapping:** Align potential AI applications with a business process framework.
- 2. Deep Problem Analysis:** Use Design Thinking to understand customer or user challenges.
- 3. AI Solution Mapping:** Apply our [AI Innovation Use Case Poker](#) method to align AI use cases with key challenges.
- 4. Prototyping:** Develop storyboards and early prototypes for identified solutions.
- 5. Solution Pitches:** Teams present and evaluate their solutions.
- 6. Implementation Planning:** Define roadmaps and next steps for Proof of Concept and MVP development.
